Letter of Thanks

Dear Professor Serhiy Komisarenko,

On behalf of all staff of Biology Institute of Shandong Academy of Sciences, I am writing this letter to express our heartfelt gratitude to you and Palladin Institute of Biochemistry of National Academy of Sciences of Ukraine for your urgent support in epidemic prevention materials when we are fighting against novel coronavirus pneumonia COVID-19.

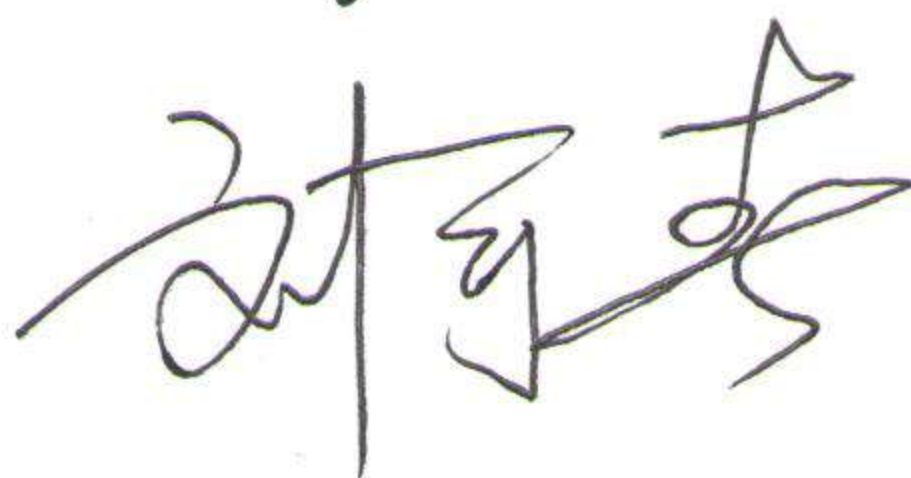

Since the outbreak of novel coronavirus pneumonia, we have actively carried out epidemic prevention and control. At this critical moment, your institute gave us a helping hand donated medical masks. These masks effectively alleviate our urgent need for epidemic prevention materials and strongly supported the epidemic prevention and control in the Biology Institute of Shandong Academy of Sciences. We totally understand that purchase and shipping of these masks is

difficult since global shortage of the epidemic prevention materials. We hereby show our hearty thanks to you for your unreserved help!

As an old friend for almost 15-years, you have always been kind and helpful since we knew each other. We promise that the masks you donated will be well used in epidemic prevention of our institute! We sincerely believe that your support is our strong backup to defeat the epidemic!

Thank you again for your kindness and I may our friendship last forever!

Sincerely

A handwritten signature in Chinese characters, appearing to be '刘可奇' (Liu Keqi), written in black ink.
